ABSTRACT

This document is a collection of 12 forms that have been designed to aid school personnel in the processing of standardized achievement tests. The forms adapt to any typical achievement test whether the scale is a classroom or a large school organization. These forms are essentially a visual aid to interpretation. For the pupil there are two forms titled Class Report and Percentiles and Individual Progress Profile. Three forms directed to the teacher are titled: Distribution by Grade, Sex, and Subtest; Correlation of Achievement and Ability; and Response Analysis. For the administrator there are five forms titled Descriptive Statistics, Comparative Grade Equivalents, Profile of Percentiles, Class Comparisons by Standard Score, and Class Group Progress Annually. For the school board there are two forms titled Standard Score Profile by Grade Levels and Subtest Analysis by Percentiles. (LN)

## FOREWORD

The Study Commission on Interpretation of Standardized Tests is planning various approaches to the task of interpreting test data. This report is in response to the frequent request for a versatile set of forms that school personnel could use for meaningful processing of standardized achievement tests.

In designing the forms, complete flexibility has been the foremost consideration. The forms will adapt to any typical achievement test. They apply to a single classroom or a large school organization. They can be modified to show either sub-test scores or total test scores.

It is assumed that the classroom teachers and supervisory personnel making the test analysis are fairly well informed concerning measurement techniques. Much of the information may be processed by a scoring machine or the test publisher. The computation terms such as average, percentile, standard deviation, standard score, etc., are explained in any introductory textbook. The forms essentially are a visual aid to interpretation.

The purpose of interpretation is important, and therefore the forms are presented in this order:

### For the Pupil

- Form 1. Class Report and Percentiles
- Form 2. Individual Progress Profile

### For the Teacher

- Form 3. Distribution by Grade, Sex, and Subtest
- Form 4. Correlation of Achievement and Ability
- Form 5. Response Analysis

### For the Administrator

- Form 6. Descriptive Statistics
- Form 7. Comparative Grade Equivalents
- Form 8. Profile of Percentiles
- Form 9. Class Comparisons by Standard Score
- Form 10. Class Group Progress Annually

### For the School Board

- Form 11. Standard Score Profile by Grade Levels
- Form 12. Sub-test Analysis by Percentiles

Following each form an example is given showing one of the ways that the form can be used. These forms may be purchased in desired quantities from the GUSREDA Office.

Wallace H. Strevell
